INDUSTRIAL UNREST FEATURED IN PRESIDENT'S MESSAGE

PEACE TREATY WAS IGNORED BY WILSON WHO URGED U. S. ADJUST ITS HOUSE

Defends Right to Strike and Bargain; Also to Protect the Public.

RAILROAD MATTER IN SEPARATE MESSAGE

Provincial Standards Should be Laid Aside and Opportunities Accepted.

By WM. PHILIP SIMMS.

WASHINGTON, Dec. 2.—Completely ignoring the peace treaty and featuring the nation-wide unrest as the big issue now before the country, President Wilson's anxiously awaited message was read before both houses of congress at noon today.

Declaring the absolute need of a definite program to bring about an improvement in the condition of labor; that governments must recognize the right of collective bargaining and the right to strike but that it is also the right of the government to protect the people against the challenge of any class, the president urged the U. S. to put its house in order by an immediate consideration of the differences between capital and labor.

"This is the hour of test and trial for America," he declared. "Let not her failure to settle matters of purely domestic concern be proclaimed to the world."

In the matter of railroads, he said he would address congress later on.

The message first advocated the establishment of a budget system, next the simplification and if possible the reduction of income and profit taxes, the regulation of coal storage, relief to the soldiers, tariff legislation and the encouragement of increased production as a means of lessening the cost of living. It also points out the necessity of the U. S. abandoning provincial standards which "have held American business as if in a straight-jacket," and the adoption of a broad policy to permit the country to "take advantage of the opportunities that are ours."

NO CABINET MEETING

International News Service.

WASHINGTON, Dec. 2.—There was no cabinet meeting today. The regular meeting was postponed to permit members to attend congress to hear the President's message read.

One-Legged Man is Only "Boarder"

Despite the acute housing problem in Albany-Decatur there is one "boarding house" not nearly filled and the manager is entirely willing to accommodate a few more boarders.

Sheriff J. V. May has as his guest at the county jail only one prisoner now—John Bennett, one legged, and charged with having assaulted another one legged citizen.

WATER POWER CITIES COME UNDER THE FUEL SAVING ORDER, IS RULED

BIRMINGHAM MERCHANTS MADE STRONG PROTEST, BUT FAILED TO GET RELIEF.

(International News Service.) BIRMINGHAM, Dec. 2.—Strong protest was made by Birmingham merchants today against the action of the regional committee in refusing to modify the fuel saving order of the government in respect to cities and towns using water power for the generation of electricity instead of steam, a committee being in Atlanta to present Birmingham's claims.

The regional committee held a meeting Monday afternoon in Atlanta to decide whether or not any exceptions or modifications would be made in the general order in respect to such towns. As soon as its decision became known, the local Retail Merchant's association appointed a committee to go to Atlanta to present arguments to the committee in an effort to re-open the question. At a meeting of the merchants of Birmingham all of them agreed to abide by the order of the fuel administrator.

GILCHRISTS ARE BILLED BY JURY

The special term of the Lawrence county grand jury, which convened Monday, today returned indictments against Garth and Dan Gilchrist, prominent Courtland men, charging murder of E. L. Wann, who died at the Benevolent hospital here as a result of pistol wounds received during an affray on the cotton platform at the Courtland depot several weeks ago.

It was expected that the two Gilchrists would be called to trial at the present term of court, but on account of the illness of A. H. Carmichael, one of the attorneys for the defense, hearing of the case may be postponed. The Gilchrists were remanded to jail without bond when arraigned for preliminary hearing in Courtland.

Percy Wann, son of the deceased, has filed suit for \$50,000 against the defendants, as a result of his father's death.

HENRY CLAY FRICK DEAD AT NEW YORK

(International News Service.) NEW YORK, Dec. 2.—Henry Clay Frick, multi-millionaire coal, coke and steel magnate, died at his home here today, aged 70. Mr. Frick suffered an attack of ptomaine poisoning nearly two weeks ago, but had almost recovered from this when another and more serious illness developed.

Road Warrants Are Being Served

Sheriff J. V. May has started serving the many warrants issued against citizens, charging road defaulting. About 32 warrants were issued against residents of Morgan county.

Effective Monday, December 15, the

TRANSMISSION LINE WILL BE ONE OF THE LARGEST IN WORLD

The transmission line, now being constructed by the Alabama Power company from the Coosa river to Albany-Decatur, via Gadsden and Huntsville, will be one of the longest loops in the world, according to an interview given the Gadsden Journal by Capt. W. P. Lay. The line is rapidly nearing completion and a temporary line will be built across the Tennessee river here soon. After permanent towers will be completed for stranding the high-powered transmission.

The Journal says: According to Capt. W. P. Lay the construction of the Alabama Power company's high tension line from Gadsden to Huntsville, which has just begun, is a part of a scheme to build a power loop in North Alabama that will be one of the longest and most important in the world.

The survey to Huntsville is complete and crews are now in the field erecting the steel towers that are to carry the wires.

Captain Lay states that the company has a line from Lock 12 on the Coosa river to Birmingham, and from that point to Sheffield and Florence. From the same generating station another line branches out to the eastern side of the state, passing through Sylacauga, Talladega and Anniston to Gadsden. With the completion of the extension to Huntsville it will be necessary to build between that city and Florence, a matter of only a few miles in order to complete the loop which will belt the entire mineral and industrial section of Alabama. This will be done as early as possible, according to Captain Lay, in order to connect up a complete system of electric power transmission, a system that will tap all towns and cities from the Tennessee river to Central Alabama as far down as Selma, a branch now being surveyed to that city.

On this great belt are stationed two emergency steam plants which together are capable of meeting any demand arising from breaks or accidents. They are located at strategic points, one on the Warrior river below Birmingham and the other on the Coosa at Gadsden. Captain Lay points out the fact that with the loop connected and complete, trouble due to breakdowns and interference in the service will be minimized. It is an interesting fact, he says, that most of the mills, mines, factories, street railways and lighting plants in industrial Alabama will soon be operated from a single generating station on the Coosa river.

What he did not say, however, was that with this vast scheme in operation he will have realized a dream of many years, for the Alabama Power company was conceived and organized by him and the creation of this giant electrical concern was due mostly to his vision and labor.

CARRANZA FORCES

NOW MOBILIZING AT BORDER POINTS; NOTE UNANSWERED

Despite Warlike Preparations Believed That Differences Will be Adjusted.

UNITED STATES WILL BACK ITS DEMANDS

"Watchful Waiting" Continues While Mexico Considers Reply to American Message

(International News Service.)

EL PASO, Dec. 2.—Carranza troops are being mobilized along the border today. The largest force is being assembled at Ojinaga, opposite Presidio, Texas.

NOTE NOT RECEIVED

(International News Service.)

MEXICO CITY, Dec. 2.—The latest United States note demanding the release of Wm. O. Jenkins had not been received by the foreign office up to a late hour Monday night, according to acting foreign minister Hilario Medina.

An optimistic feeling is developing here that the difficulties between the United States and Mexico over the detention of the American consular agent at Puebla will be satisfactorily adjusted.

MUST MEET DEMANDS

(International News Service.)

WASHINGTON, Dec. 2.—Carranza must meet the demands of the U. S. squarely or face the full power of this government. This is the attitude taken by the administration today, as the state department awaits answer to the latest note to the Mexican government demanding the release of Wm. O. Jenkins.

Officials here believe that the Carranza government will meet the demands of the note, inasmuch as the document was couched in terms which left no doubt as to the sincerity of this government in its purpose.

CONGENITALLY IRRATIONAL AND MENTALLY SUB-NORMAL FROM BIRTH.

(International News Service.)

LOS ANGELES, Dec. 2.—What undoubtedly will be the bulwark of defense for Harry S. New, Jr., confessed slayer of his sweetheart, Freda Lesser, formerly of Birmingham, Ala., when he faces trial for murder here, was revealed today when testimony contained in thirty depositions taken by the defense leaked out with sensational results. The depositions, taken in Indianapolis, Ind., illuminate the strange life mystery of the prisoner.

They tell the unbiased story of his relationship with his alleged father, U. S. Senator Harry S. New, and disclose startling facts and buried secrets in connection with New's claim that he is the son of the senator. With the depositions, Attorney Le Compte Davis, chief counsel for the defense, is ready to go into trial to prove New congenitally irrational and mentally sub-normal from birth.

Thirty witnesses testified.

The majority of these gave their opinion on his mental peculiarities because of his constant depression and brooding over the alleged circumstances of his birth. Among the prominent witnesses testifying in New's behalf are: Col. Robert Tinsell, of the famous Rainbow division; Major Sidney F. Miller, of the same organization; Gavin L. Payne, an army captain and two lieutenants.

Evidence that strikes like a thunderbolt in Indiana and Washington where Senator New is prominent is contained in the testimony of Martha Scudder, New's aunt on his mother's side of the family. Mrs. Scudder resides in Indianapolis, New's native home. She testified that Senator New and Mrs. Lillian Berger, her sister, were the parents of two sons. One of these sons, she testified, is Harry New Jr., the other was Stewart New, named also for the senator. That child died two years after he was born.

Shriners to Meet Tonight at 7:30

All members of the local Shriners club are requested to meet tonight at 7:30 at the Central National Bank to perfect plans for a banquet on Thursday, December 11th.

T. A. Bowles, President.

Morgan County Farms Need Terracing

By ERNEST CARNES, County Agent.

The high price of farm lands, farm products, and commercial fertilizers make the problem of farm terracing a very important one for this fall and spring. There are hundreds of farms in Morgan County that are gradually becoming poorer and more depleted every year primarily from soil erosion. Gutters are being formed in parts of the fields and the stalks of cotton and corn are getting smaller and smaller each year. The Tennessee River and its tributaries are gradually robbing you and your posterity of your inheritance.

Most every wide awake farmer of Morgan County will readily agree that terracing coupled with cover crops and deep plowing is the only solution; therefore, it behoves every farmer, that needs terracing done, to make this part of his program for this fall and spring; however, terracing should not be done until one is ready to plow the land terraced. The corn level.

Get in with two or three of your neighbors and purchase a Bostrom Level as it will cost you very little and you will always have it on hand.

It is very necessary that the terraces first be properly surveyed giving them the right grade, otherwise, they are doomed to be a failure no matter how well they are built up.

DOOR OF NATION LEAGUE IS CLOSED TO STUBBORN GERMANS

Is Threat Contained in Allied Reply to Scapa Flow Note.

(International News Service.)

LONDON, Dec. 2.—The allies have replied to the note of Germany refusing preparation for the sinking of the interned German fleet at Scapa Flow and expressing surprise.

"So long as the German conscience does not understand that evil must be repaired and criminals punished, Germany must not expect to enter the community of nations," says the reply; "nor can Germany expect to obtain from the allies forgiveness for her faults nor amelioration of the just conditions of peace."

Get Morgan County Out of the Mud**VOTE FOR THE GOOD ROADS BOND ISSUE****DAILY MUST ADVANCE ITS SUBSCRIPTION PRICE**

For the first time during its entire existence, the Daily is compelled to advance its subscription price. This is due, it may be taken for granted, to dire necessity and not to any desire to make big profits.

During the war, when other newspapers advanced their rates, the Daily managed to get along. It hoped that with the end of hostilities, there would be a return of normal conditions. Strange to say, during the first year of the war the manufacturers made only slight advances in the price of white paper. More than two years ago, the advance began. Since the signing of the armistice, quotations have jumped. Print paper, which cost around \$2.00 per hundred pounds three years ago, is now as scarce as sugar and costs any amount that the mills have the conscience to ask, for the demand is far ahead of the supply. Only yesterday, one mill offered a few tons for sale at \$8.40 a hundred pounds. It was snapped up. Publishers are expecting paper to reach \$12.00 per hundred, and even then it will be hard to obtain. There is no hope for relief within a year.

At present prices, the Daily will consume about \$1,200 worth of white paper per month, or nearly \$15,000 a year. This is about \$10,000 per year more than the same item of expense three years ago.

In addition, there has been an advance in wages and salaries all up and down the line. The high cost of living has made this imperative. Ink, machinery, type and every article used in the printing trade has also greatly advanced in price.

This frank statement is made in order that the public may know for itself just why the subscription price of the Daily is to be increased. With equal frankness it can also be stated that the carrier boys, the little fel-

lows who brave the rain and the snow, the heat and the cold, are to receive 5 cents per week for delivering the paper, instead of 3 cents per week. It has been found impossible to secure competent boys without paying them more.

The new price of 15 cents per week is ten cents per week cheaper than the rates of the Birmingham News or the Birmingham Age-Herald, who delivered here by carrier. Comparison will show the Daily carries more news of interest to the local public than any of the metropolitan journals.

The readers of the Daily are asked to accept the new subscription rates as cheerfully as they do the high cost of cotton or the higher wages paid the working man. The purchasing power of the dollar has been cut in half, and a 15 cents a week price now is in effect a reduction from the price of 10 cents charged before the war, for in buying value it represents only 7½ cents.

FUEL CONSERVATION IS A NATIONAL NECESSITY

The war is over—but it ain't. The same fuel conservation measures that were in force and effect during the titanic world struggle are in effect today.

American industry is on the verge of a complete tie-up, while the retail establishments are allowed to keep their doors open only part of the time.

A crisis confronts the nation, for the government has determined to allow the coal strike to proceed in order that the public may get its part of the medicine.

The Lever act, a war-time measure, is the instrument used to carry into effect the mandate of the administration.

In the premises, there is nothing to be done but to accept the situation cheerfully and calmly. The same patriotism that sent the nation sugarless to bed with a smile on its face will be in evidence again now, when light and heat are taboo.

There is a process of adjustment going on that cannot be checked. Like most virulent maladies it must run its course. All that Dr. Garfield and the other physicians for national ills can do is to administer a bit of soothing syrup and see that the patient is not exposed to unnecessary drafts.

Everybody and every business must get along as best as it can. There is a better day ahead.

Just sit tight in the boat and be glad it is no worse. There is only one thing less endurable than war—the reconstruction period that always follows war. Sherman could have well compared war to "Flu" for its after-effects are more dreadful than the disease itself.

JUST IN PASSING**NEW ORLEANS WIDE OPEN**

"I happened to arrive in New Orleans on Thanksgiving day, the very day that the saloons were thrown open under the protection of an injunction granted by the federal district court," said Marvin Rankin. "Now, lest my visit to the Crescent City at that particular time be considered something more than a coincidence, it is in order for me to explain that I am a Sunday school superintendent and furthermore that I was accompanied by Mrs. Rankin. Despite these facts, however, by keeping my eyes open, I discovered that liquor was flowing very freely and that the drought was being broken by many persons, including both residents and non-residents of the Louisiana metropolis. The high cost of living was in evidence, and most drinks sold for 50 cents each over the bar, while prices generally were much higher than prevailed in pre-war days.

GRANGER LIVER REGULATOR

For all Liver Complaints, Constipation, Indigestion, etc. PRICE 25c AT ALL DRUGGISTS

Whiskey, I was told, sold for \$10 per quart and upward, with other stimulants in proportion."

HANDSOME CALENDAR

The first 1920 calendar to be received by the Daily is from the Harris Motors Company, of Decatur, enterprising dealers in motor vehicles. The calendar is of artistic design and is most attractive in appearance.

WATER WITH ASPIRIN

Bayer Company, who introduced Aspirin in 1900, give proper directions.

The Bayer Company, who introduced Aspirin tell in their careful directions in each package of genuine "Bayer Tablets of Aspirin" that to get best results one or two glasses of water should be drank after taking tablets.

"Bayer Tablets of Aspirin" to be genuine must be marked with the safety "Bayer Cross." They are getting the genuine, world-famous Aspirin, prescribed by physicians for over eighteen years.

Each unbroken "Bayer" package contains proper directions for Colds, Headache, Toothache, Earache, Neuralgia, Lumbago, Rheumatism, Neu-ritis, and Pain generally.

Handy tin boxes of twelve tablets cost but a few cents. Druggists also sell larger "Bayer" packages. Aspirin is the trade mark of Bayer Manufacture of Monoacetic acidester of Salicylic acid.—Advertisement.

The Lever act, a war-time measure, is the instrument used to carry into effect the mandate of the administration.

In the premises, there is nothing to be done but to accept the situation cheerfully and calmly. The same patriotism that sent the nation sugarless to bed with a smile on its face will be in evidence again now, when light and heat are taboo.

RAILROAD ADMINISTRATION

SPPEAKS AT FLORENCE

Hon. A. G. Patterson of Albany was the guest of the Business Men of Florence at their weekly luncheon at the Hotel Reeder today. Mr. Patterson was recently named a member of the Alabama Highway Commission from the 8th Congressional District, and he was also recently appointed a member of the National Democratic Committee for the state of Alabama.

He is a most pleasing speaker and his remarks were heard with interest by the big crowd of business men gathered to greet him. Hon. H. A. Bradshaw introduced him as "one of the few office holders in Alabama who had never received a salary."

Mr. Patterson is much interested in the success of the Highway Bond issue, which is to be voted on next February and his acquaintance with the good points of the proposed new law is accurate and exhaustive.

He was much pleased with the progress of Florence and with the great work which is under way at Wilson Dam, which he visited this morning. —Florence News.

All Officials Are Told to Make the

(Continued from Page 1.)

ive of the U. S. Fuel Administrator. Municipal and County officers are asked particularly to cooperate directly with these agents and officers.

In case of refusal to comply with these regulations, coal supplies or electric current will be cut off and where it appears that a violation of law is involved, Federal District Attorneys will be asked to act.

It will be necessary to continue restrictions until there is a substantial increase in production. Unless this substantial increase comes soon, still further restrictions may become necessary, and consideration will have to be given to the distribution of stocks of coal now in the possession of industries not recognized as vital.

In a general way, regulations issued today eliminate electric signs and display advertising; limit industries, except public utilities and plants engaged in continuous processes that cannot be interrupted, to forty-eight hours operation per week; permit stores and office buildings to use light, heat or power only between the hours of 9:00 a. m. and 4:00 p. m., and permit theatres, moving picture shows and other public amusement places to use light, heat or power only between the hours of 1:00 p. m. and 10:30 p. m.

Exceptions allow drug stores, (for the sale of drugs only), restaurants, dairies, and bakeries to operate according to their present schedules, barber shops to use light, heat or power from 8:00 a. m. to 6:00 p. m., and stores selling food and clothing to use light, heat or power on Saturday nights until 9:00 p. m. Other exceptions are made to meet the special conditions of railroad stations, hospitals, telephone and telegraph and newspaper offices, and to permit stores and office buildings to turn on their heat two hours before opening time in the morning.

The regulations, which apply alike to consumers now receiving coal from the railroads and to those who have stocks on hand, or who are using electric power, heat or light, furnished by public or private plants, are as follows:

Heat

1. Between the hours of 7 a. m. and 4 p. m. only enough heat (obtained from coal, gas or steam) may be used in offices, stores, warehouses, manufacturing plants as to keep the

average temperature at 70 degrees F. This temperature may be maintained in theatres, moving picture houses and other places of public amusement between the hours of 1 p. m. and 10:30 p. m.

Exception. On Saturdays the temperature may be maintained at 70 degrees between 7 a. m. and 9 p. m. in case of stores handling food and wearing apparel.

2. After closing hours on Saturday and after 4 p. m. on the remaining week days and on Sundays, only enough heat is to be used to prevent freezing of water pipes or sprinkler systems. Where exceptions are made in certain classes for lighting, heat will be allowed during allowable lighting period.

2. In manufacturing plants or plants coming under power curtailment rules, heat (to 70 degrees) will be allowed only during that time allowed for use of power.

4. No curtailment on use of coal, steam or gas for producing hot water for hotels, restaurants or barber shops.

Power

1. No manufacturing plant or factory shall operate in excess of 48 hours per week.

Exception (a) Dairies, Ice and Refrigerator Plants, Bakeries, Plants for the manufacture of necessary medicinal products, Waterworks, Sewerage Plants, Gas Manufacturing Plants, Plants operating continuous processes (such as acid manufacture, blast furnaces, etc.) Printing plants for the printing of newspapers, periodicals, battery charging outfitts and plants producing light or power for telephone, telegraph or public utility companies are exempted.

2. Elevator service must be curtailed as much as possible.

General exception to light, heat and power provisions—necessary operation of Federal, State, Municipal and County institutions and buildings.

Light

1. No ornamental lights, white-way or other unnecessary street lights, outline lighting, electric signs or illuminated bill boards are to be operated. This does not affect street lighting necessary for the safety of the public.

2. Stores, manufacturing plants and warehouses must not use electric or gas lights (except safety lights) except between the hours of 9:00 a. m. and 4:00 p. m.

Exception (a) Drug stores, for the sale of drugs only, and restaurants may remain open according to present schedule, but most curtail number of lights 50%.

Exception (b) Railroad Stations, Hotels, Hospitals, Telephone, Telegraph and Newspaper offices are not included insofar as necessary lighting is concerned.

Exception (c) Lights may be used in offices of manufacturing plants for necessary accounting purposes at any time.

Exception (d) General and office lights must be cut off at 4:00 p. m. in office buildings except where office operation of vital industries is involved.

Exception (e) Moving Picture houses and theatres and other public places of amusement may burn lights only between 1:00 p. m. and 10:30 p. m.

Exception (f) Barber shops may remain open from 8:00 a. m. to 6:00 p. m.

Exception (g) Dairies, Ice and Refrigerator Plants, Bakeries, Plants for the manufacture of necessary medicinal products, Waterworks, Sewerage Plants, Gas Manufacturing Plants, Plants operating continuous processes (such as acid manufacture, blast furnaces, etc.) Printing plants for the printing of newspapers, periodicals, battery charging outfitts and plants producing light or power for telephone, telegraph or public utility companies are exempted.

Exception (h) On Saturday nights, time of closing mentioned under paragraph 2, will be extended until 9:00 p. m. for stores selling food and wearing apparel.

Since November 17 deliveries of coal, with certain necessary specific exceptions, has been limited to consumers in the first five classes of the preference list. These classes are:

Class A—Railroads and inland and coastwise vessels.

Class B—Army and Navy, together with other departments of the Federal government. This includes bituminous coal consumed by manufacturers or producers of supplies for departments of the Federal government.

ment when such department officially approves the request.

WOMAN'S MISSIONARY SOCIETY CENTRAL M. E. CHURCH

The Woman's Missionary Society of the Central M. E. church met in the home of Mrs. R. M. Buchanan Monday afternoon. Mrs. L. P. Troup conducted the devotions and was leader—“Women in New Realms.”

Class E—Retailers (supplies for domestic consumers).

REGIONAL COAL COMMITTEE

BOSTON FIRE OFFICERS WITHDRAW FROM A. F. L.

(International News Service.)

BOSTON, Dec. 2.—The Officers' club of the Boston Fire Department has voted to give up its American Federation of Labor charter in the International Association of Fire Fighters. The charter was obtained 2 years ago. The International Association has taken an active part in causing widespread agitation for higher wages and better working conditions for firemen.

The action is said to be due to criticism by firemen of the club's opposition to the two platoon system, which plan was defeated in the recent State election.

Our Bounden Duty.

Man's bounden duty is everywhere and in all things to forward the progress of humanity. The supreme virtue is sacrifice—to think, work, fight, suffer, where our lot lies, not for ourselves but others, for the victory of good over evil.—Mazzini.

The Whale as an Eater.

The whale rarely, if ever, swallows anything larger than a herring. Although the head is of enormous size, from one-quarter to one-third length of the body, and the mouth fifteen to twenty feet long and six to eight feet wide, the opening of the gullet is not larger than a man's fist.

To Fortify the System Against Grippe.

Take LAXATIVE BROMO QUININE Tablets which destroy germs, act as a Tonic and Laxative, and thus prevent Colds, Grippe and Influenza. There is only one "BROMO QUININE." E. W. GROVE'S signature on the box.

THEN I SETTLED DOWN AND WAITED FOR THE ZERO HOUR. A COOL HARD SNEER CROSSED MY FACE—ALL YEARNED FOR WAS THE COMMAND THAT WOULD SEND ME OUT—

SAY, DO YE KNOW IT'S PAST TWELVE O'CLOCK?

Keep The System Clean And You'll Be Healthy

Elimination helps to avoid colds, headaches and epidemics

ANYONE who has watched himself or bilious, when you feel a cold or a fever coming on, when there is nothing so important to health and comfort as regular daily elimination. Half of the minor illnesses of life are due to neglect of this. The five million men who were in our army know the importance of this.

In absence of the President, the Vice-Pres. Mrs. Lovin took the chair and called the meeting to order. Mrs. Ezell added her name to the roll. Election of officers was the chief business. The Lord's prayer was repeated in concert, and adjourned. A social hour with light refreshments served—a most pleasant time was spent.

By all means try to regulate your diet by intelligent diet and exercise, but when these fail you will need a laxative, one as near to nature in its action as skill can make it. In the opinion of many thousands of good Americans such a one is Dr. Caldwell's Syrup Pepin, which is a combination of simple laxative herbs with pepin. It acts promptly, gently and without griping and will certainly regulate any tendency to constipation that you may have.

In spite of the fact that Dr. Caldwell's Syrup Pepin is the largest selling liquid laxative in the world, there being over 6 million bottles sold each year, many who need its benefits have not yet used it. If you have not, send your name and address for a free trial bottle to Dr. W. Caldwell, 311 Washington St., Monticello, Illinois.

At All Drug StoresCOUNCIL TO MEET
The Albany city council will meet in regular session tonight. Routine matters will be discussed and the monthly reports of officers received.

BIRTH

Born to Mr. and Mrs. W. C. Blizzard, a son, Calvin, Jr.

Well, Why?

Why is it that the man who has his picture taken standing beside a vase of flowers set on a table covered with a lace doily is always the man who is reported to the police and the newspapers by his wife as among those missing?

Christmas and Winter Relief

There will be no house to house canvas, but kettles will be put on the street in Albany and Decatur on Friday, December 12 to 23, where everybody can put in their donation toward the Christmas Basket for the Twin Cities. We will accept anything—canned goods, fruit, potatoes. About fifty baskets will be put out.

WOODEN SHIPS

They are remembering forests where they grew; The midnight quiet and the giant dance; And all the singing summers that they knew.

Are haunting still their altered circumstance; Leaves they have, lost, and robins in the nest; Tug of the friendly earth denies to ships; These and the rooted certainties and rest—

To gain a wavy girdle at the lips

Only the wind, that follows ever aft, They greet not as a stranger on their ways;

But this old friend, with whom they drank and laughed.

Sits in the stern and talks of other days When they held high bacchanalias still

Or dreamed among the stars on some tall hill."

A gentle spirit may express itself in rude words of illiteracy; it is not therefore rude. (Ruffianism may speak the language of learning or religion; it is ruffianism still. Strength may wear the garb of weakness and still be strong; and a weakling may carry the weapons of strength, but fight with a faint heart.—Harold Bell Wright.

Mr. and Mrs. Marvin Rankin have returned from New Orleans, where they had a most enjoyable time. Mr. Rankin was in the Crescent City in connection with the organization of a new casualty insurance company, of which he is one of the stockholders.

Mrs. Prince G. Putnam of Sheffield has returned home after spending the week with Mrs. Alice Johnson, on Second avenue.

DON'T WAIT

Take Advantage of a Decatur Citizen's Experience.

When the back begins to ache, Don't wait until backache becomes chronic;

Till kidney troubles develop;

Till urinary troubles destroy night's rest.

Profit by a Decatur citizen's experience.

Mrs. Virginia Calvin, 1213 4th Ave.

says: "I had been in poor health for quite a long time. I had just recovered from the grip when I noticed my kidneys were in a weak and disordered condition. There was a painful sensation extending up into the neck of my bladder and I was in bed most all the time, up one day and down the next and I felt miserable. I had large circles and puffy spots underneath my eyes and all the remedies I tried brought me no relief. Finally, one of the family suggested me trying Doan's Kidney Pills and he got a supply at Dilliehay Brothers' Drug Store. I began using them and soon felt much better. I have spoken to many of my neighbors about Doan's Kidney Pills."

T. M. Rone of Eva was here today the guest of his son, Dr. Omar Roan.

F. A. Woods is suffering a severely bruised foot.

THE SEATS OF THE MIGHTY.

A certain captain went calling upon the village belle. The old man kept a very vicious housedog and upon the occasion of the officer's call the dog was untied. When the fearsome canine had finished with the captain the dog was untied. His brother officers, jostling him about his predicament, asked if the girl was worth risking his anatomy in that fashion. The captain replied:

"Maybe not, but I have always been willing to give up my seat to any lady!"—Judge.

Camel Cigarettes

CAMELS are as delightful to your taste as they are new. And, so satisfying that they meet every cigarette desire you ever have had.

Camels are unusual; in fact they're unlike any cigarette you ever smoked. That's because they're an expert blend of choice Turkish and choice Domestic tobacco, producing a quality that meets your taste as no other cigarette ever did.

Camels' expert blend gives that mellow-mild-body and frees the cigarettes from any unpleasant cigarette aftertaste or any unpleasant cigarette odor. You can smoke Camels as liberally as you like without tiring your taste.

You have only to get personally acquainted with the expert Camel blend to know that you prefer it to either kind of tobacco smoked straight!

For your own satisfaction compare Camels with any cigarette in the world at any price!

R. J. REYNOLDS TOBACCO CO., Winston-Salem, N. C.

Camels are sold everywhere in scientifically sealed packages of 25 cigarettes, or ten packages of 25 cigarettes in a glassine paper-covered carton. We strongly recommend this carton for the home or office supply or when you travel.

18 cents a package

SEND YOUR DAMAGED TIRES HERE

to be vulcanized. Then there will be no sign of puncture or tear, nothing to indicate the tires were damaged. No patches, no plugs. Just the edges of the break brought together and welded into completeness. It's the only right way to repair tires and like everything else, the best is the cheapest.

ONLY A MIRACLE CAN SAVE LLOYD GEORGE OF ENGLAND

By HORATIO BOTTOMLY, M. P.,
Editor of John Bull.

LONDON, Nov. 26.—Unless something very like a miracle happens soon the Coalition will fall to pieces and the King will be looking for a new Prime Minister. Even on the Government side there is a growing number of M. Ps. who are losing their fear of the "Whips" and preparing to assert their independence in the division lobbies.

It is not for nothing that I have so often spoken of Mr. Lloyd George as the wonderful Wizard from Wales. He has exceptional talents for what his friends call "negotiation" and his enemies "intrigue." And within the last week or two there have been a good many significant goings and comings in those exalted circles where high political personages live and have their being. So before I assume the garments of mourning and talk with appropriate solemnity of the Coalition Deathbed, let me point to one or two possibilities that may stave off the final crisis.

It may be taken as certain that in the days ahead the Prime Minister will rely less than formerly upon his Conservative counsellors and lieutenants, who on several matters of great importance have "let him down" badly. He intends, I gather, to lean upon the business men whom he has summoned to his councils, and at the same time, to see an understanding with labor. I do not, of course mean that it is the Premier's ambition to replace Mr. Adamson and to put himself at the head of the queer amalgam of the Parliamentary Labor Party. Not at all.

The expert political Cabinet maker can fix up a "coalition" out of almost anything. It is quite likely, and indeed more than probable that we may see one or even two more attempts at coalition government before our Chinese puzzlemakers throw up the sponge and look round for some saner method of managing the affairs of the British Empire unlimited. And somehow I fancy that—despite his present doubts—the right honorable member for the Cumnarvon Boroughs Mr. Lloyd George, will contrive for some time yet to be in the centre of the picture.

U. S. Submarine Driven on Rocks

(International News Service)
NEW LONDON, Conn., Dec. 1.—The U. S. submarine R-6 was still on the rocks at the entrance to the local harbor this morning, despite attempts of naval vessels to pull her off. She went on the rocks early Sunday morning when she dragged her anchors. She is in a precarious condition.

Prince Back Home After Long Absence

(International News Service)
LONDON, Dec. 1.—The Prince of Wales arrived home today after an absence of four months, during which he visited Canada and the U. S.

The Prime Minister will, in all likelihood seek an understanding with labor—not with the Snowdens, the Macdonalds, the Jowetts, the Similes, the Hodges, or the Williams, but with the "rank and file" of the great democratic movement, of which these extremists are hoping to make temporary use. It may be taken for granted that the pros and cons of the matter have already been discussed in Downing Street, and that this is one of the magic draughts which at the bedside of the dying Coalition the political physicians have prescribed.

It is as true today as ever it was that "England does not love Coalitions," but unfortunately there seems to be no help for it in the present curious condition of political affairs. It is extremely doubtful whether if a general election were held next month any of the old parties would obtain what is called a "working" majority. But where people are apt to go wrong is in assuming that there is only one make of "coalition" on the political market.

The expert political Cabinet maker can fix up a "coalition" out of almost anything. It is quite likely, and indeed more than probable that we may see one or even two more attempts at coalition government before our Chinese puzzlemakers throw up the sponge and look round for some saner method of managing the affairs of the British Empire unlimited. And somehow I fancy that—despite his present doubts—the right honorable member for the Cumnarvon Boroughs Mr. Lloyd George, will contrive for some time yet to be in the centre of the picture.

Mother & Daughter Doing Well

"Mother and myself, taking the advice of some kind friends, are taking Mayr's Wonderful Remedy for bad stomach and liver trouble and bloating. The medicine is rightly and well named 'Wonderful,' for such it is. It has certainly done wonders for us both." It is a simple, harmless preparation that removes the catarrhal mucus from the intestinal tract and allays the inflammation which causes practically all stomach, liver and intestinal ailments, including appendicitis. One dose will convince or money refunded. For sale by S. M. Thompson, Albany and Owl Drug Co., Decatur and druggists everywhere. Advertisement.

AMUSEMENTS

"THE HOPE CHEST"
MOST ATTRACTIVE

Said to Be Splendid Vehicle for Dorothy Gish—Delite Wednesday.

In the picturization of Mark Lee Luther's "The Hopo Chest," Dorothy Gish carries the same personality and character that made her famous in "Hearts of the World." In many scenes she uses almost the same costume, and the disdainful tossing of her head; the chin and teasing expressions that once brought peals of laughter from the audience when she acted the "Little Disturber" part; the whole individuality of her biggest success are being used to make this picture the most attractive in which she has as yet appeared. It will be displayed at the Delite theatre next Wednesday.

Director Elmer Clifton states that the picture is like nothing else ever done as to characterization, pathos, sympathy and laughter. George Fawcett, the veteran character actor, spent several weeks rehearsing and advising with Miss Gish as to the way in which certain scenes should be played.

ONLY 1 GERMAN PERMITTED
TO LIVE IN PARIS DURING WAR

(International News Service)
PARIS, Dec. 2.—There was just one German who lived in Paris all through the war—with the permission of the authorities, quite undisturbed, and that was Dorothea, the aged keeper of the German Embassy in the Rue de Lille.

Dorothea had no friends. Solitude called upon her, and one afternoon, taking the key to the embassy's wine cellar she excavated several bottles and began enjoying life in the caretaker's cottage.

By 8 o'clock that night Dorothea had so far forgotten the police restrictions on her movements that she set out to see a musical show. In a moment of delight she uttered a noisy "ach!" was promptly picked out as an enemy and hurried away to the police station.

The next morning, Dorothea, penitent and with an aching head, was taken back to the embassy. She was told that the next time she made a sortie she would be interned for the remainder of the war.

Great Care Taken of Silk.
Silk is the most costly of all fibers and in the raw state represents a value so great as to be guarded in its transportation like a shipment of bullion. It is shipped from coast to coast in special, solid express trains, under strong guard, the shipments ranging in value from \$5,000,000 to \$25,000,000.

The Christmas Gift to

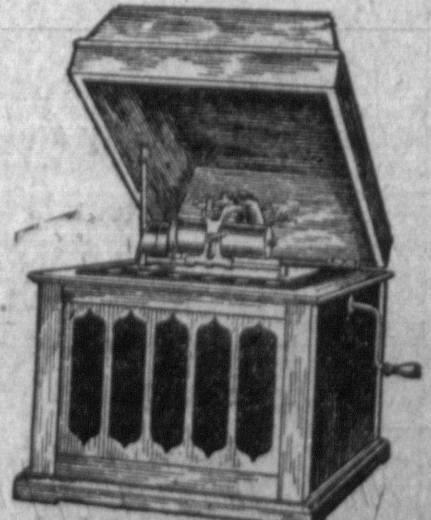

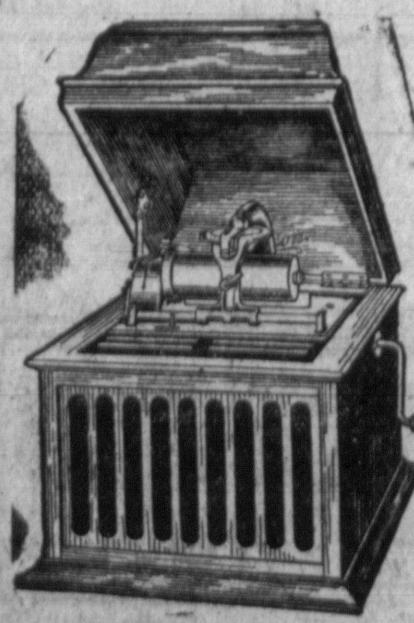

The NEW EDISON
"THE PHONOGRAPH WITH A SOUL"

The Whole Family

Most devices for sound reproduction merely echo the artist's voice. And an echo is a subdued and modified imitation of the original. The New Edison, is the only instrument which Re-Creates the artist's voice with such fidelity that when subjected to the tone test, the test of direct comparison with the living voice, no human ear can distinguish artist from instrument.

Come in now and make your selection. For a small deposit will hold any instrument until you want it.

ATTRACTED BY "GOLDEN BED"

Big Man in His-Day.

Goliath, the Philistine giant, must have caused a lot of trouble for the army quartermasters of his day. How did they get a regulation uniform to fit him, for he stood eleven feet three inches in his stocking feet; if, indeed, Philistines of those times wore stockings.—Boston Post.

Fruits of Old.

Many of the fruits and vegetables now eaten in England were almost unknown to our forefathers. Not until Henry VIII's time were raspberries or strawberries or cherries grown in England, and we do not read of the turnip, cauliflower and quince being cultivated before the sixteenth century.

Wise Indeed!

He is a wise man who can on occasion put up or shut up—but he is a wiser man who can put up and shut under the German flag.

The new American motto would seem to be "Don't Give Up the Ship" unless England wants it.

Time heals wounds. If you said, "About a hundred years from now a young descendant of the German Kaiser will visit the United States, Government officials will hurry to meet him, servile crowds will bow and cheer," what protests would rise. "Never, never," the people would say. "Never a welcome to any successor of the Hohenzollern who did such dreadful things in Belgium."

The Americans about a hundred years ago would have said the same about any successor of King George, whose agents hired red savages to kill Americans, including women and children.

This country has given a pretty fair reception to the young Prince of Wales, with never a thought about the red Indian massacres. Man is a forgetting animal, fortunately. It would sour him if he had to remember his history.

The head Red Cross worker in Armenia is here to tell the United States Government that "its first duty" is to the inhabitants of Armenia, in danger of destruction at the hands of Turks.

The gentleman is mistaken. This Government has just one hundred million responsibilities that come ahead of any responsibility abroad. It has the responsibility for each American inhabitant. Everything possible should be done for Armenians, for all the fourteen hundred million human beings that live on this earth outside of the United States. But the Government's FIRST duty is to those that live here, a fact forgotten quite often.

Some one suggests that to settle the coal problem, farmers should take the place of strikers in the mines. The farmers will not do it—too sudden a transition. But the day will come when men will do more than one kind of work, which will be an excellent thing for the human mind and for industry.

Henry Ford is now working on that line. One of his plans is to put factories in agricultural regions where there is water power, use the power for farm machinery and irrigation in summer, build factories next to the water power and give the farmers and their families employment at high wages in winter. Let the factory rest in summer, the farm in winter. That is real intelligence.

At this writing Carranza, of Mexico, still has the American Consul Jenkins safely locked up. The United States threats don't agitate Carranza.

At Constantinople, Ibrahim Efendi, head of Mohammed's church, congratulates the United States on having put into the Constitution the prohibition idea that Mohammed gave to the Turks thirteen hundred years ago.

The other piece of news from Turkey tells of cutting down of harems. Mohammed allowed each man four wives, to make up for no alcohol. But the high cost of living has struck the harem. American travelers are surprised by Turks offering to make them a present of one or two surplus young women.

It costs something to strike on a big scale. The steel men have made up their minds to go back in the Pittsburgh district, so mill owners say. In ten weeks the men's loss in wages amounted to more than twenty-nine million dollars. Mills will make up their loss with bigger orders, higher prices. Workmen won't. It is time the workmen invented something better than the strike.

The real fight will probably be between Russia and Japan. With millions of extra Japanese population, sparsely settled Siberia, fertile and rich in undeveloped resources, is very tempting. Japan intimates that it may be her sad DUTY to meet all alone the Bolshevik menace.

That is nothing for the white race to worry about. If Japan keeps Bolshevikism busy, Bolshevikism in turn will probably keep yellow Japan busy while the rest of the world rebuilds.

She has all necessary records for that purpose at her disposal and she is always ready to furnish numbers quickly, cheerfully and courteously.

You can help "Information" to be of even greater service to telephone users, if you will not ask her for numbers that you can find in the Telephone Directory.

TODAY

The New American Motto.
Time the Heater.
100,000,000 Responsibilities.
Ford's New Idea.

By Arthur Brisbane.
The Imperator, a great German ship, in American waters and in possession of the United States Government, is turned over to England at her demand. It goes to the Cunard company.

A collection of ships belonging to the American Standard Oil Company are seized and held by England on the ground that they had been sailing under the German flag.

The new American motto would seem to be "Don't Give Up the Ship" unless England wants it.

Time heals wounds. If you said, "About a hundred years from now a young descendant of the German Kaiser will visit the United States, Government officials will hurry to meet him, servile crowds will bow and cheer," what protests would rise. "Never, never," the people would say. "Never a welcome to any successor of the Hohenzollern who did such dreadful things in Belgium."

The Americans about a hundred years ago would have said the same about any successor of King George, whose agents hired red savages to kill Americans, including women and children.

This country has given a pretty fair reception to the young Prince of Wales, with never a thought about the red Indian massacres. Man is a forgetting animal, fortunately. It would sour him if he had to remember his history.

But the Government's FIRST duty is to those that live here, a fact forgotten quite often.

Some one suggests that to settle the coal problem, farmers should take the place of strikers in the mines. The farmers will not do it—too sudden a transition. But the day will come when men will do more than one kind of work, which will be an excellent thing for the human mind and for industry.

Henry Ford is now working on that line. One of his plans is to put factories in agricultural regions where there is water power, use the power for farm machinery and irrigation in summer, build factories next to the water power and give the farmers and their families employment at high wages in winter. Let the factory rest in summer, the farm in winter. That is real intelligence.

At this writing Carranza, of Mexico, still has the American Consul Jenkins safely locked up. The United States threats don't agitate Carranza.

At Constantinople, Ibrahim Efendi, head of Mohammed's church, congratulates the United States on having put into the Constitution the prohibition idea that Mohammed gave to the Turks thirteen hundred years ago.

The other piece of news from Turkey tells of cutting down of harems. Mohammed allowed each man four wives, to make up for no alcohol. But the high cost of living has struck the harem. American travelers are surprised by Turks offering to make them a present of one or two surplus young women.

It costs something to strike on a big scale. The steel men have made up their minds to go back in the Pittsburgh district, so mill owners say. In ten weeks the men's loss in wages amounted to more than twenty-nine million dollars. Mills will make up their loss with bigger orders, higher prices. Workmen won't. It is time the workmen invented something better than the strike.

The real fight will probably be between Russia and Japan. With millions of extra Japanese population, sparsely settled Siberia, fertile and rich in undeveloped resources, is very tempting. Japan intimates that it may be her sad DUTY to meet all alone the Bolshevik menace.

That is nothing for the white race to worry about. If Japan keeps Bolshevikism busy, Bolshevikism in turn will probably keep yellow Japan busy while the rest of the world rebuilds.

The Japanese will find fighting Russia very different from fighting the Russian Czar. The next Japanese-Russian fight will be no Japanese picnic. It may use up a good deal of the surplus Japanese population.

Supplying Your Winter Wants Is Simple With Our Immense STOCKS TO DRAW UPON

There are no suits in the lot alike. This means exclusiveness—which is something well worth looking for. The materials are Tricotine, Serges. Some show severe tailored lines; braid and buttons having been used to add to the embellishments of others. There are numbers handsomely fur trimmed and the linings are beautiful, fancy pussy willow silks.
